Subject: FW: AWG LCA report and appendices
Attachments: AppendixA-AWG_BottledWaterDatav2_9.24.18.xlsx; AppendixB-Results_Template_AWGBottledWaterv2_9.24.18.xlsx; AWG_LCA_Report_Draft_9.24.18.docx; AWG Water Quality Report Final Draft.docx

Please find attached the revised water quality report, merging both our review of the testing data you provided to us as well as the microbiological testing we performed on the system you provided. Also please find the LCA report as well as 2 related appendices. We are sending these out for external peer review and are requesting comments back to us by November 16. We will then incorporate our responses to those reviews and clear the documents through our internal system so that they can then be official external EPA reports available to anyone .

We certainly appreciate your willingness to provide both the equipment and your expert input to complete both elements of this work. We also look forward to your review of these documents. I responded to comments from your initial review in my email last Friday, but feel free provide any further comments. I would ask that you either provide comments directly to the text or send a separate list of numbered , and provide these by November 16. As noted earlier, we will update the LCA report with the corporate status of EcoloBlue before final publication. I also ask that you make sure you review these documents for anything your team considers confidential business information since these documents will be made publicly available.

Thanks again, and let me know if you have any questions.
